iDMSS APP FOR iPhone DEVICES

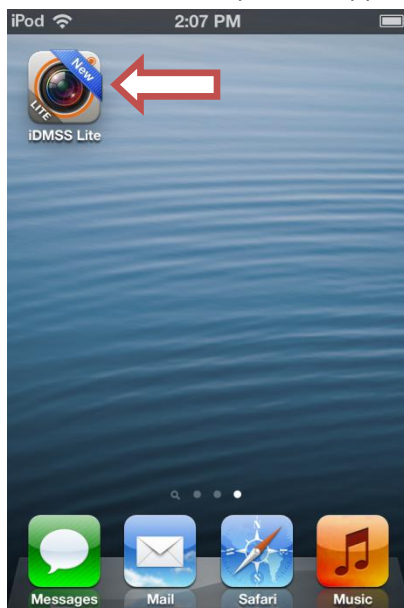

Customers who wish to view their DVRs online through their iPhone or iPod mobile device must follow these instructions step by step.

Downloading the app:

1. Go to App Store on your device; in the search bar type in **iDMSS**, and press search.
2. You will see a search result page like the one bellow. Click the **install** icon.

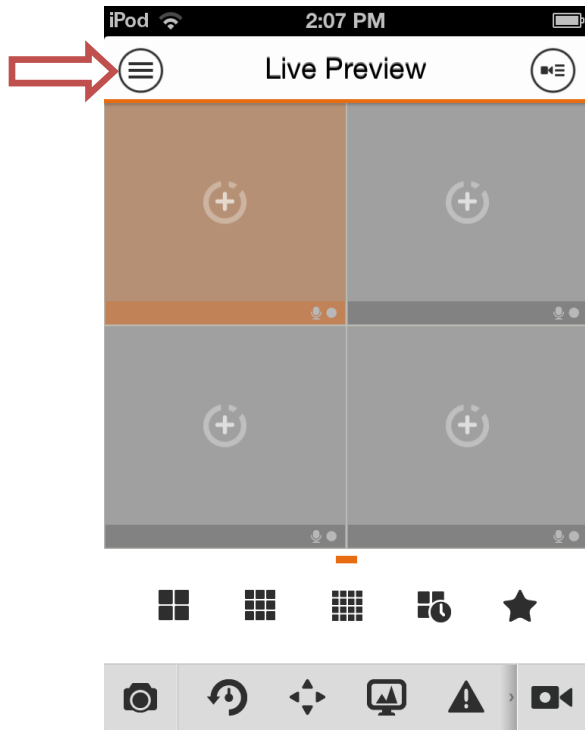

3. After the application is installed, go to the app screen on your iPhone and look for the iDMSS icon. Click on it to open the app.

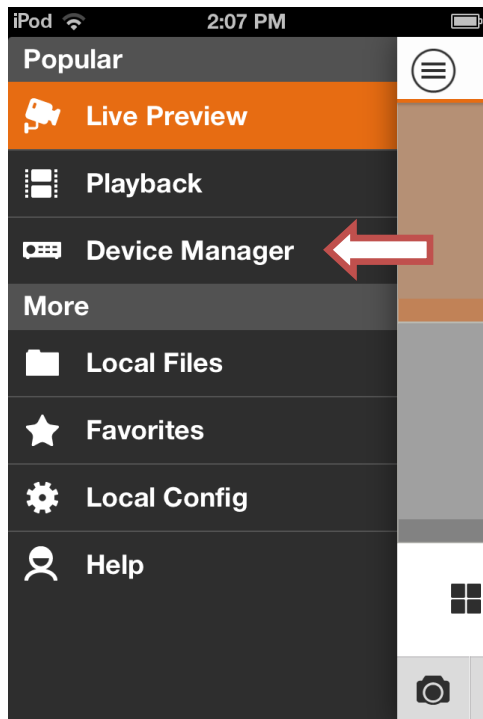

Establishing Connection:

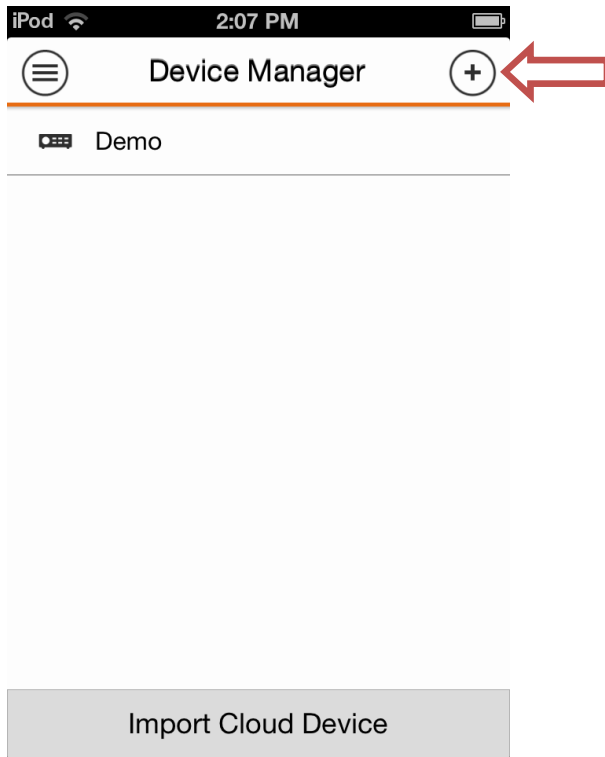

4. After the app opens, click on the menu icon on the top left.

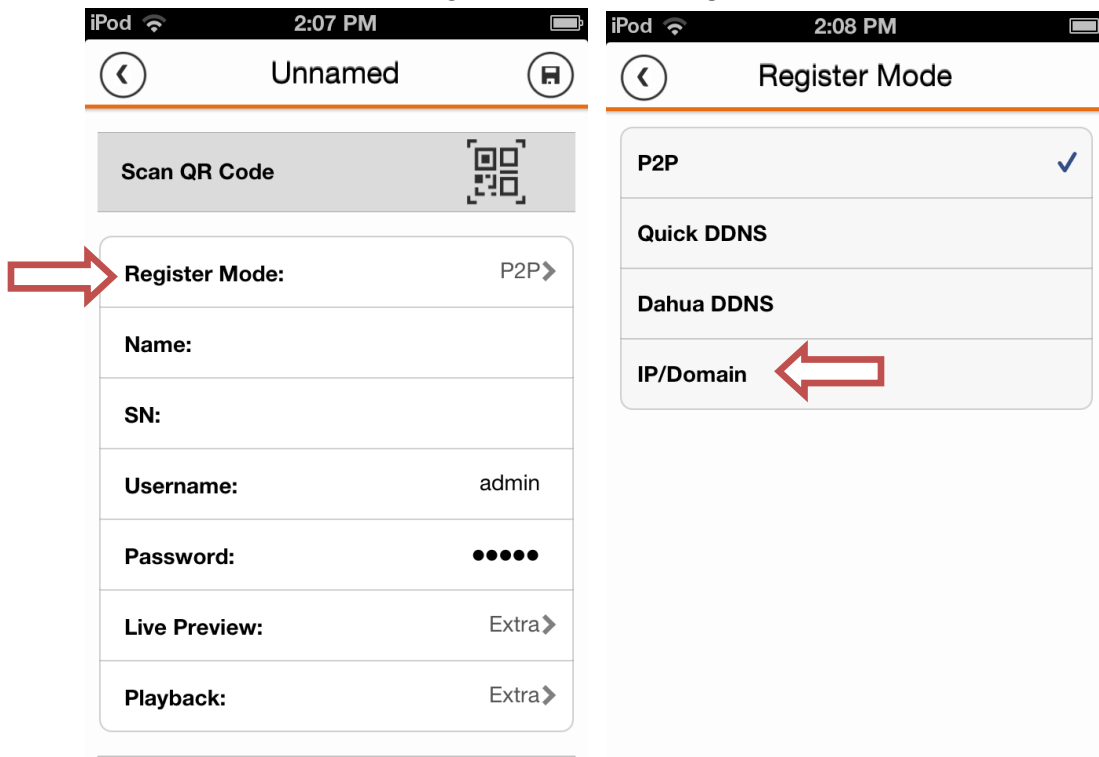

5. On the next screen click on *Device Manager*.

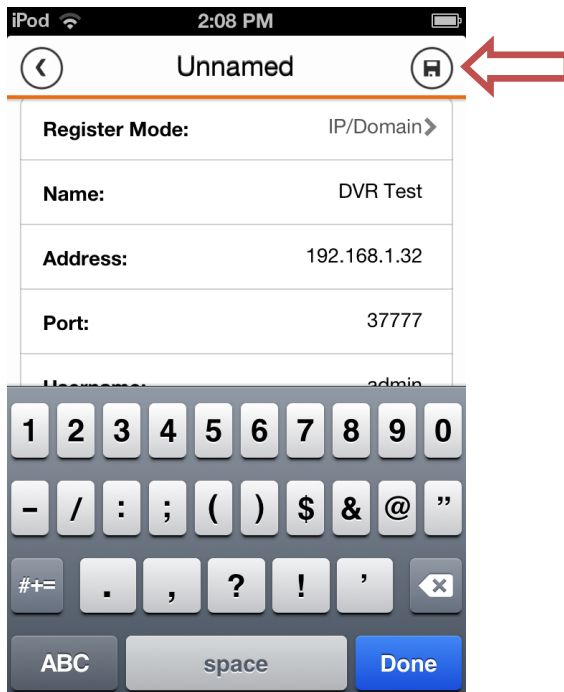

6. On the next screen, click on the + (plus) sign on the top right of the screen.

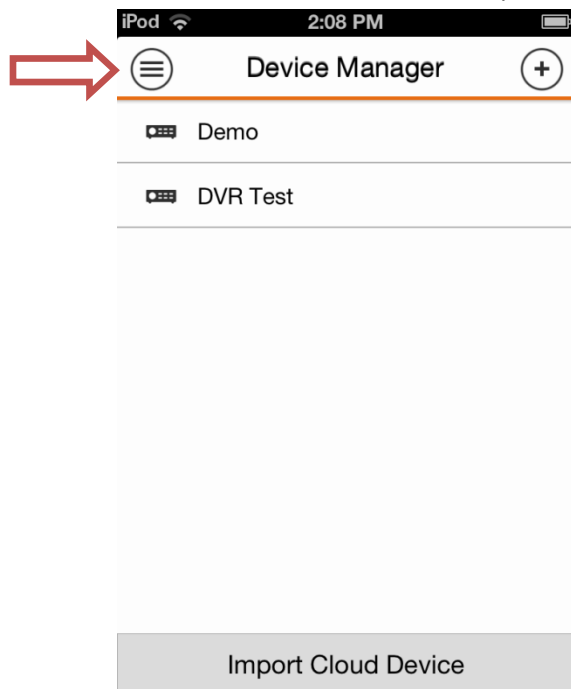

7. On the next screen, click on *Register Mode* and change it to *IP/Domain*.

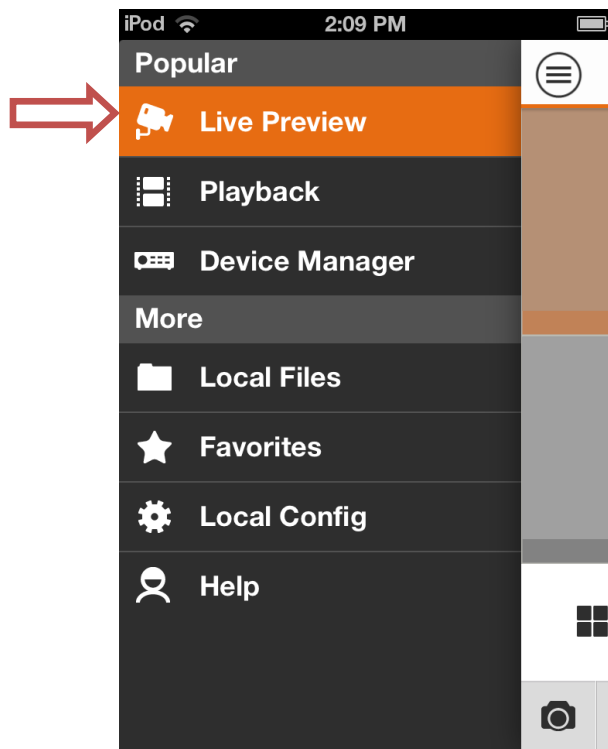

8. Type in the DVR information: Name (anything you want), IP address, port, user name and password. Then press the save button on the top right of the screen.
(if you wish to add multiple DVRs you can do so repeating the previous steps)

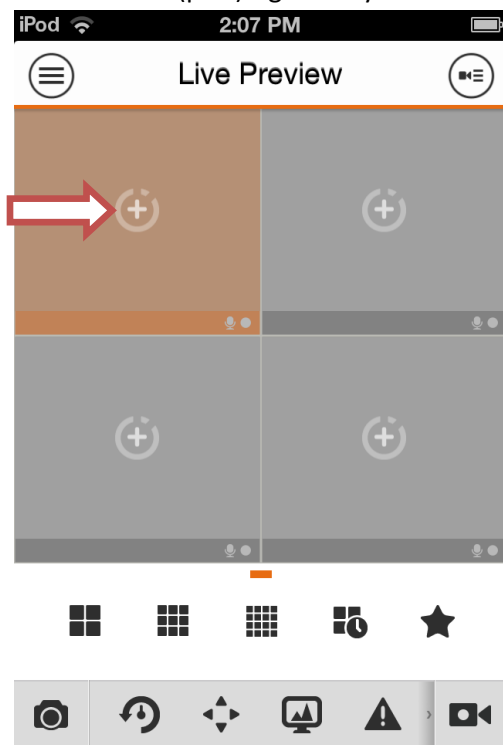

9. Click on the menu icon on the top left to expand the main menu.

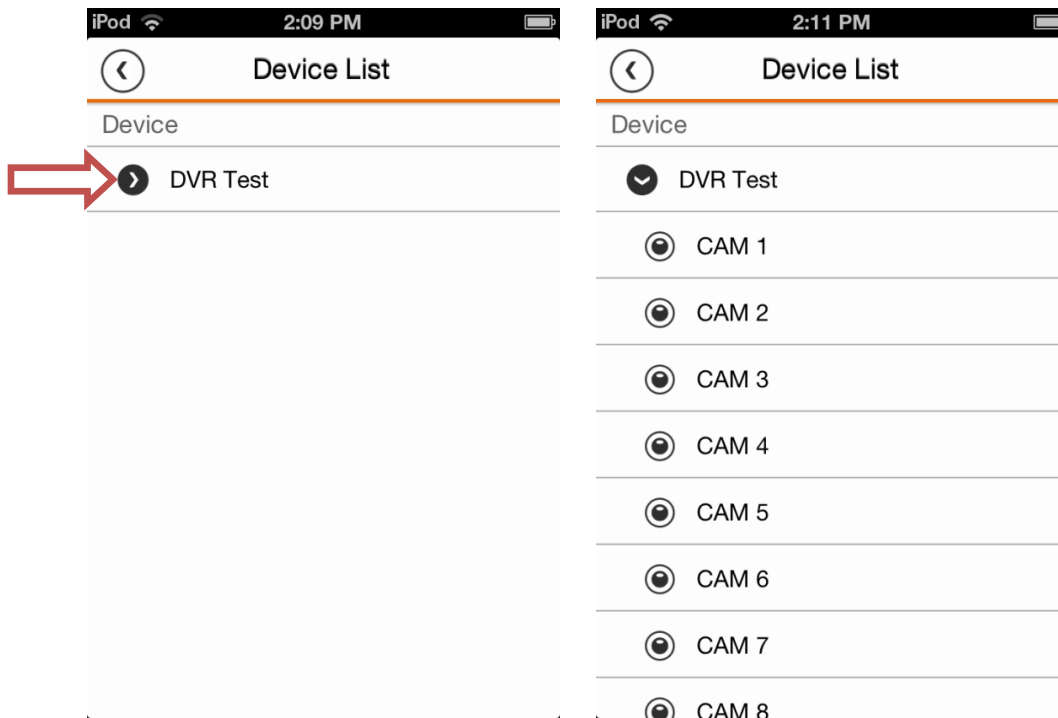

10. Click on *Live Preview*.

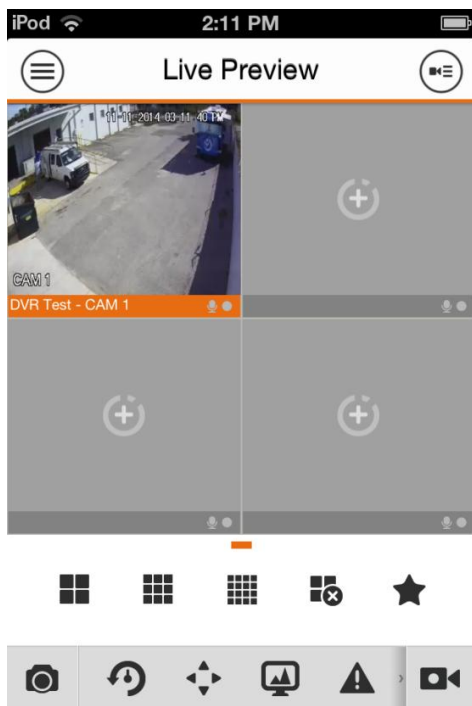

11. Click on the + (plus) sign in any of the available channels (four channels are displayed by default)

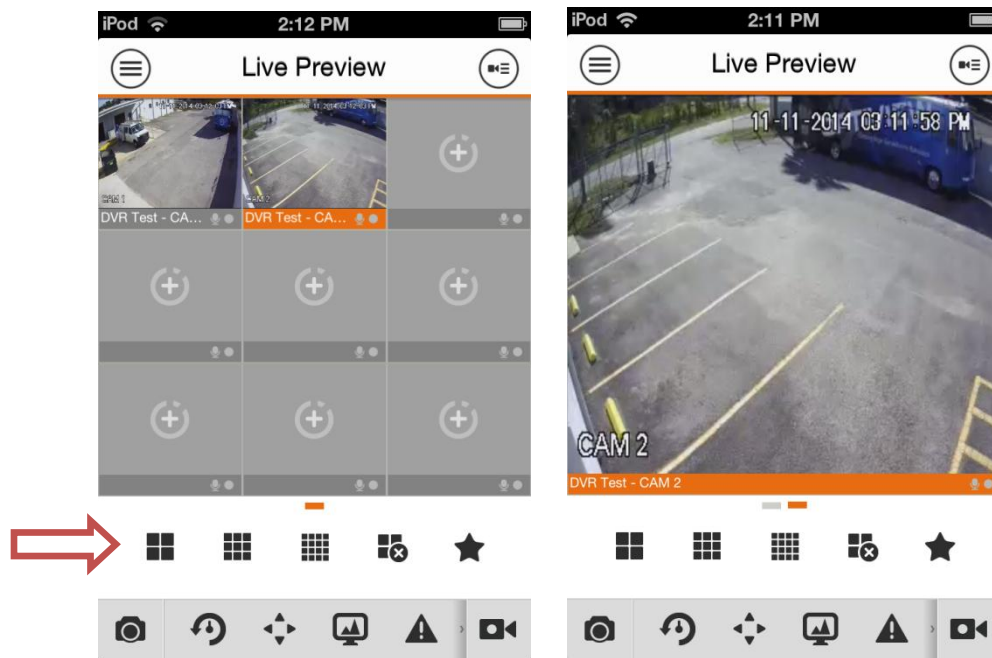

12. Click on the name of the DVR you just added to expand and then select a camera from the drop down menu.

13. The camera you selected will show up on the screen. You can select multiple cameras to be viewed at the same time by repeating the previous steps using the available squares on the screen.

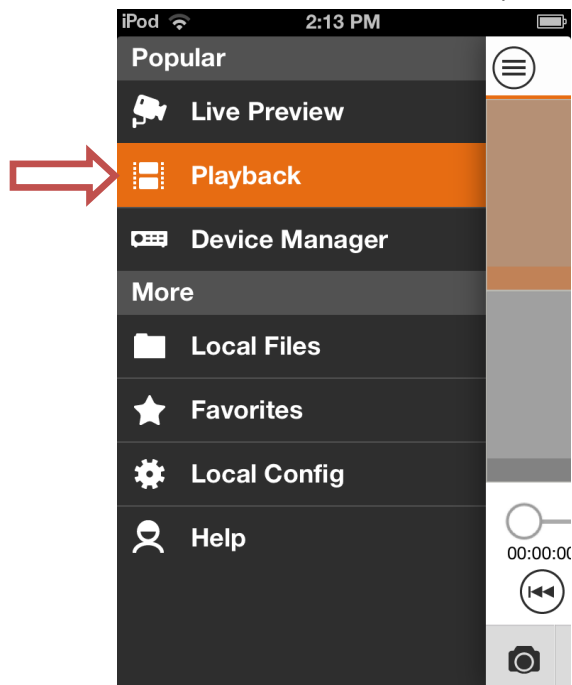

14. You can use the square buttons to change the screen up to a 16 view. If you double tap one square, it will become full screen for just that camera. You can double tap again to go back.

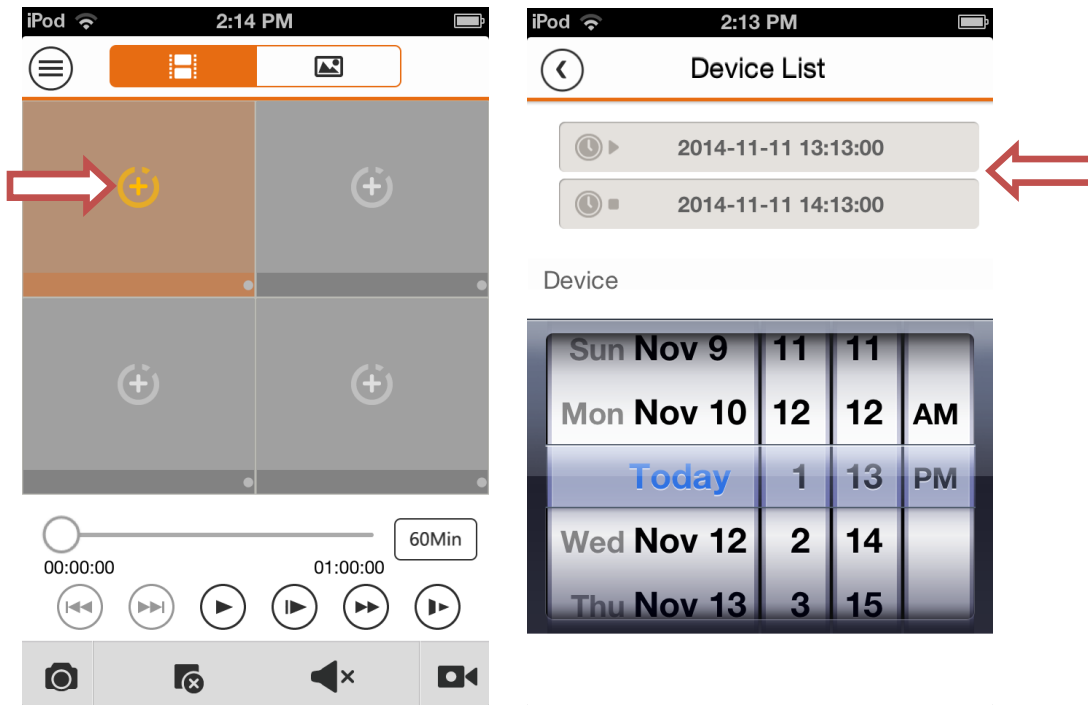

Playback Recordings:

1. Click on the menu icon on the top left to expand the main menu. Then click on *Playback*.

- On the Playback screen, click on the + (plus) icon. The screen to chose a time frame to playback will appear. Select the begin and end date/time to playback.

- Click on the Device name to expand and select a camera to playback.

4. You will see the controls at the bottom of the screen to control the playback.
