32 Channel 5-Way 4K 2U DVR with Analytics

### Perimeter Protection

Combine Tripwire & Intrusion with object detection (people or vehicles) for advanced motion detection.

### ID+

Advanced motion detection that filters out false alarms and only triggers with people or vehicles.

### Face Recognition

Detect & Recognize faces that are and are not (stranger mode) in a database. Pair with Access Control.

### AI Coding

AI Coding can help reduce more than 50% bit rate and storage compared to H.265 and H.264

### 4K Over Coax

Record up to 32 channels at 4K video resolutions and H.265 / AI Coding for video compression.

## PERIMETER PROTECTION

Combine multiple tripwire and intrusion rules with object (people or vehicle) detection to enable advanced motion detection alarms and alerts. Ideal for crosswalks, parking lots, communities, lawns, schools, and more.

### ID+

Intelligent Motion Detection Plus, or ID+, is an upgraded version of ID that greatly improves the alarm accuracy only triggering motion detect when people or vehicles are detected, filtering out tree movement, lighting changing, and more.

## REAL TIME FACE RECOGNITION

The HDVR324K-Q8-AID comes fully equipped with advanced facial attributes analysis. Identify, capture and record people based on gender, age, expression, glasses, mustache, face mask. With real time facial feature filtering, you can display faces with targeted features.

## SMART NIGHT COLOR

With Smart Night Color technology, you can select Smart Illumination Mode for the system to automatically switch between IR mode and white light mode. It allows white light to be turned on when a target is detected by the ID+ / Perimeter Protection function of AI-enabled recorders. This significantly reduces light pollution at night. Together with other modes, including IR Mode and White Light Mode, the smart dual illumination technology can meet the requirements of a wide variety of scenes.

## SCHEDULED AI

This technology allows multiple AI functions to be set for one channel based on time frames, eliminating the need to manually configure the system to switch between functions each time. Scheduled AI greatly increases efficiency and widens the number of scenarios that the device can be used in.

## AUDIO OVER COAX

The integrated design can reduce wiring troubles which makes it much more cost-effective and convenient for installation.

## ONE-CLICK ARMING/DISARMING

With just one click, you can enable or disable alarm linkages to show messages, send emails, output audio alarms and more, through the mobile app and platform.

## CUSTOMIZABLE ALARM AUDIO

Designed for your convenience, the alarm can be customized to meet your needs. It is flexible, allowing you to directly upload your customized audio through the mobile app and recorder.

## AI CODING

Compared with H.265/H.264, AI coding can reduce more than 50% bit rate and storage requirements without loss of decoding compatibility, providing clear human and vehicle details.
